Original Manufacture Certificate for IRD Mechanalysis model IRD8800 Machinery Protection Monitor

The IRD Mechanalysis model IRD8800 series of Machinery Protection Monitors, suitable for vibration monitoring systems and turbine supervisory instrumentation, is 100% designed and manufactured by IRD Mechanalysis Ltd of the above Registered Office.

The model IRD8800 evolved from the highly successful IRDMechanalysis model IRD8700 with over 300 systems in regular use in India and abroad over the last decade. The microprocessor based programmable model IRD8800 was launched for Customer use in April 2008 and the first systems were successfully commissioned in July08. Since then deliveries have been made on a continuous basis.

The model IRD8800 was designed to the American Petroleum Institute (API670) specification which is the Global Standard for on-line machinery vibration monitoring systems. The IRD8800 has undergone extensive field trials and type tests. It is certified with the European Union CE Mark.

We confirm that IRD Mechanalysis Ltd is the sole proprietor of the model IRD8800 system.
