

PRESS RELEASE – FEB 2006

Mechanalysis (India) Ltd represents Commtest Instruments Ltd of NZ

Mechanalysis (India) Ltd (MIL) is pleased to announce that they have secured the exclusive representation of Commtest Instruments Limited of New Zealand for South Asia for their complete range of FFT vibration analysers and on-line surveillance instrumentation and software.

This strategic alliance fills a much needed gap in the Indian market left by the closure of IRD Mechanalysis in USA and UK. Mechanalysis has supplied over 250 automated data collection systems in India and indeed the very first system at the start of the PC revolution. Unfortunately many of these systems have now been made obsolete largely due to the amazing rapid developments of PCs and software. However, the vibration analysis data collection technology is now maturing; this is where Commtest entered the market in the late 1990s learning from past developments and capitalising on mistakes. They have modern platforms that are not restrained by legacy software designs. The MIL-Commtest Partnership will enable system upgrades and replacements in India.
